

A fusion of style
and function

Design to inspire

The dream kitchen needs to have the perfect ingredients. The right worktops can provide the finishing touch, or even be the focus for the overall design. Take a look at our range of stunning on-trend finishes, built on decades of product research and understanding. These worktops look sensational, plus you can be confident of an exceptional performance in the kitchen, utilising technically brilliant and durable construction. We control all aspects of production from sourcing sustainable materials to manufacturing in our own UK factory. That's the winning recipe; outstanding and inspirational decors combined with a solid structure at a reasonable price.

Inspiration for every taste

From the warm welcome of classic woodgrains to a cool, contemporary stone or metallic, these worktops provide an eye-catching feature to any kitchen concept. We have a fabulous range of designer decors, including the latest character Endgrain Oak woodgrain, beautiful marble effects and ultra chic concretes. Developed from our ongoing design journey, taking influences from around the globe, talking to designers and checking out the latest design exhibitions, you can be sure to find inspiration in our worktops that can lead to a whole new direction.

As you would expect from Kronodesign, good looks are just for starters, our high pressure laminate worktops set the benchmark for durable, high quality construction. Made in the UK from the latest technology high pressure laminate, they are robustly water, heat and abrasion resistant, and built to last with a sealed back edge, and either a laminate wraparound or a high quality bonded ABS front edge. All worktops also have a sealed under edge to prevent the penetration of moisture and steam.

Utilising our own high quality environmentally friendly Particleboard at the core, we are reassuringly green too.

Beautiful. Practical. Antibacterial

All our worktops are inherently hygienic because of their built-in antibacterial properties. They have been tested in accordance with the internationally recognised ISO 22196:2011. This standard evaluates the antibacterial activity and measures the reduction in bacteria over a 24 hour period, as well as the effectiveness of the antibacterial properties on the surface. The antibacterial protection on the surface of our worktops delays the growth of up to 99.9% of the most frequent bacteria, such as Streptococcus Faecalis & Escherichia Coli. This makes them especially suitable for use in the home as well as shops, restaurants.

This latest worktop collection also looks great with a level of quality that you can feel. Not just the beautiful textures but a reassuring solidity that appeals to all the senses. We manufacture the core product as well as the surface at our state-of-the-art UK production facility, so we can keep total control of the standard of construction. We maintain certification to the Furniture Industry Research Association (FIRA) Gold Worktop Technical specification FPG S008 and hold British Standard Certification BS EN438-1: 2005.

Durability, solidity, beauty and safety combine to set the benchmark for high quality construction that underpins the integrity of all our worktops, and gives a standard of finish you can depend on. Our postformed worktops are produced with a special HDF strip, which strengthens the front edge of the worktop. This technical innovation enhances the quality of the profile and increases the impact resistance of the board. A special silicone strip is placed underneath the profiled edge along the entire worktop length, forming a drip barrier and protecting it against water ingress.

A bold new generation of decors

Too perfect is just a little bit bland and boring isn't it. What really catches the eye are the small details; the knots and splits in a piece of character oak, the unexpected faults in a swirling marble. The little marks that give a decor a connection to reality, a step away from the uniformity of mass production. So take a closer look at some of our bold new decors, the raw beauty of Coast Evoke Oak or the naturally chaotic patterns in Cloud Nebula. Or if a little bling is more your thing check out the beautifully reflective metallic flecks in the Andromedas. Whatever your preference the attraction is in the detail.

Stone. Contemporary yet ageless

Have the luxurious look of stone without the hefty weight and costs. From the drama and glamour of granite to the beauty and expressive character of marble, there are a range of shades and tones to suit any scheme. Add a choice of realistic textures and you're in touch with a superb selection of the modern or the classic.

A new industrial revolution built on concrete and steel

The re-imagining of industrial city centres has led to a design trend all of its own. Now you can have the look without the hassle, and take the style statement of concrete or steel worktops to your kitchen. Unique shades and textures create tasteful yet practical versions of this modern classic to transform any space.

Bring the warmth of wood to your kitchen

Woodgrains are an ongoing favourite for a number of reasons: their character, warmth and colour bring a reassuringly practical dimension to the kitchen. Woodgrains can be more than traditional, intriguing endgrains and block woods give a new twist, as do the on-trend grey tones. It's wood, but with the wow factor.

Textures

Slate (SL)
Deep slate texture that reflects the distinctive look and feel of weathered stone.

Fine Pore (FP)
A understated delicate wood pore that refines the decor.

Rough Stone (RS)
Soft riven slate type texture. Suitable for natural stone decors.

Perl (PE)
A subtle, burnished surface detail.

Used Effect (UE)
A burnished surface finish, that give an extra degree of patina to stone and metal decors.

Silk Matt (SM)
Elegant semi-matt finish with a smooth silky touch.

Super Matt (SU)
Texture combining matt effect with smooth, high-grade optics for a resplendent appearance.

Gloss (SQ)
A gloss finish to enhance and compliment the effect of the decor.

Crystal (CR)
A sophisticated texture that offers a delicate surface shimmer.

Glitter Gloss (GG)
High gloss surface, enhanced with a fine amount of shiny real aluminium bits and sparkling glitter finish suitable for stone decors.

Glitter Matt (GM)
This elegant matt texture, combining a soft, silky touch with the eye-catching and subtle sparkle of aluminium flecks.

Palazzo Touch (PH)
Inspired by vintage marble and soapstone textures, the dual gloss surface replicates natural cracks and indentations with a burnished, waxy touch.

Worktop profiles

Post-formed

Post-formed worktops are based on raw particleboard covered with a decorative HPL laminate and strengthened on the front with a special strip, making them ideal for counters in kitchens, offices and shops.

ABS Square Edge

This is the modern version of a worktop and features a straight edge and 1.5mm ABS edging that gives a sturdy, square look. The simple, cleaner lines make these worktops perfect for any contemporary or minimalist kitchen design.

We take care

Care for your worktop

Kronodesign® worktops are easy to maintain, simply use a damp cloth and a mild detergent or non-abrasive cleaner to keep the surface clean and hygienic. Stubborn stains should be removed immediately (the use of abrasive cleaners should be avoided).

Whilst your worktop is resistant to high temperatures, you should always put hot objects on to heat resistant mats or trivets. Our gloss finish will enhance and compliment the effect of the decor, however it is advisory to take extra care with gloss finish worktops as they are more prone to marking. Try to avoid sliding objects across the surface of the laminate. To prevent damaging the surface, always use a chopping board for preparing food. Full details for care and maintenance can be found in the Care Guide included with every worktop or discuss with your retailer.

Care for your environment

We only supply FSC® certified wood products. All of our timber inputs are either traceable to a forest that is managed sustainably, or recycled waste wood diverted from landfill. We monitor our use of water and energy constantly to identify opportunities to reduce usage and have invested heavily in processes that generate energy from woodbased carbon neutral fuel, significantly reducing carbon emissions. Our products are also lifecycle stretching, acting as a carbon sink that at some point in the future can be further recycled or burnt for fuel.
